

# Double Tank Conveyor Dishwasher

### Features

- New design of washing arm that easy to dismantle and clean
- High efficiency wash pump with fully stainless steel impeller
- New design of washing arm with wide angle water jet type nozzle design, reach perfect washing quality and anti-clog
- Independent regional type design for prewash and wash tank structure, to prevent cross contamination and low water lever while operation, two tanks connected with food grade silicon hose, compliance with food hygiene
- Double layer door to prevent heat loss, energy saving, easy to operate and maintain
- Whole machine is made of SUS304 stainless steel for durability, compliance with hygiene and anti-rot

**VT-R21**

Rack Type	2 Tank+1 Rinse Conveyor
Dimension	1905*684*1655mm
Loading Height	450mm
Capacity	248 Racks/hr
Rinse Usage	2L/Rack
Wash Pump Power	1.5kW + 1.5kW
Wash Tank Heater	12kW + 12kW
Booster Heater	36kW
Power Supply	400V/50Hz/3ph
Steam Supply	90kg/hr
Electrical Loading	64kW/3.5kW
Dryer Optional:-	
Length	850mm
Height	2050mm
Motor Power	1.5kW
Heater	9kW
